

NSResponder

```
classDiagram
    class NSResponder {
    }
    class SFSilentResponder {
        + doCommandBySelector()
    }
    SFSilentResponder --|> NSResponder
```

The diagram illustrates a class hierarchy. At the top is the 'NSResponder' class, represented by a white box with a thin black border, divided into three horizontal sections. The top section contains the class name. Below it is a class 'SFSilentResponder', represented by a gray box with a thin black border, also divided into three horizontal sections. The top section contains the class name, the middle section is empty, and the bottom section contains the method signature '+ doCommandBySelector:'. A blue arrow with a hollow triangular head points from the top of the 'SFSilentResponder' box to the bottom of the 'NSResponder' box, indicating that 'SFSilentResponder' inherits from 'NSResponder'.

SFSilentResponder
